Summary

Dynamic Software Engineer with extensive development experience, specializing in React, Node.js, and Python. Served as interim ICT Manager at Mzuzu Airport Rehabilitation Project, where I oversaw critical infrastructure upgrades and ensured technical operations aligned with modern facility standards. Proven track record in enhancing application performance, evident as I was selected to take part in the UNDP Hackathon as a supervisor. Skilled in mobile app design with Flutter and adept at collaborating with cross-functional teams to meet project deadlines. Committed to driving innovative solutions that boost user experience and operational efficiency.

Work Experience

Team Supervisor, UNDP

- Led a team as a supervisor for a hackathon competition organized by UNDP, where I mentored, tutored, and guided teams throughout the competition.

ICT Manager and Support, Mzuzu Airport Rehabilitation Project

- Supported the Mzuzu Airport Rehabilitation Project as an ICT Manager, ensuring smooth operations until the project's completion.

Software Engineer, Dream Code Limited, Blantyre

- Engineered and maintained web applications using React, Node.js, and Django.
- Developed and deployed mobile applications with Flutter, significantly enhancing user experience and performance.
- Collaborated with cross-functional teams to gather requirements and deliver timely solutions.
- Applied Python for rigorous data analysis and backend development, ensuring efficient data handling and processing.

Education

- Degree, Computer Engineering, Livingstonia University (Completed Oct 2025)
- Advanced Diploma, Computing and Information Systems, Polytechnic Continuing Education Centre

Skills

Python, PHP, JavaScript, Dart, C#, React Native, React, Node.js, Next.js, Django, Flask, TypeScript, Flutter, Java, Android Studio, MySQL, MongoDB, Firebase, PostgreSQL, Power BI, Tableau, Networking software and hardware
